

BE GREEN
AND CLEAN

USE COLD WATER!

Cold water cycles clean effectively and save energy!

- Use the cold water cycle for all wash-loads, except heavily soiled loads, since up to 90% of the energy used for washing clothes goes to heating the water.
- Use cold water to wash bright colors and woolens.
- Clean the lint screen to ensure maximum air flow is achieved to dry quickly and save energy.

The cold facts:

- 💧 "Delicates/Cold" is the cold water setting.
-
- 💧 An average washer uses 90% less energy when using cold water.
-
- 💧 Cold water makes clothes last longer.
-
- 💧 Cold water cleans as effectively as hot water.
-
- 💧 Modern soap is designed to work with cold water.
-
- 💧 Using cold water saves natural gas (and carbon)!
-
- 💧 Oil and berry stains are the only stains that need hot water. Pre-treating works best!
